

We build AI platforms our clients own instead of rent, and we operate them after they go live. We work with operations-heavy and regulated teams, and the same senior team does the strategy, the build, the deploy, and the on-call.

CORE COMPETENCIES

- **Custom AI platforms.** Multi-tenant systems the client owns, with an internal AI registry, governance, and per-team controls.
- **Agents & workflows.** Intake, document review, routing, and follow-up, plus Electronic Performance Support (EPSS) that puts guidance, checklists, and job aids inside the workflow at the moment of the task.
- **MCP & connector engineering.** Secure bridges into systems of record: custom MCP servers, OAuth 2.1 connectors, and legacy-API integrations.
- **Data pipelines.** Typed schemas, retrieval indexes, and pipelines out of legacy systems that have no modern API.
- **Conversation & call intelligence.** Tasks, decisions, risks, and follow-ups pulled out of calls and transcripts, then indexed so they can be searched by meaning.
- **24/7 operations.** On-call, monitoring, model updates, and skill maintenance. Severity-1 response within 30 minutes, 99.9% SLA-ready uptime.

DIFFERENTIATORS

- The client owns the code from day one.
- The same senior team does strategy, build, deploy, and operations. The principal is on every engagement.
- We operate what we ship. We are not a build shop that hands over a repository and leaves.
- Multi-year engagements running production AI in regulated environments, including legal and healthcare.
- **Security and governance built in.** Internal AI registry of every system and its owner, full audit trails, human-in-the-loop checkpoints where judgment matters, and least-privilege scoped access for agents and MCP servers. Client data stays in the client environment. BAA and NDA are standard. Code escrow, runbooks, and written handoff terms.
- We design architectures that can target agency ATO and IL requirements. We do not hold a FedRAMP authorization, an ATO, or an IL rating today.

PAST PERFORMANCE

- **Enterprise AI platform.** Platform architect and security gate for a client running 60+ production AI systems. Every system inventoried in the internal registry, every change reviewed before it ships.
- **Legal intake platform.** Replaced 4 SaaS tools with one owned system. Intake review went from about 3 days to under 4 hours. Live in 5 weeks, and it saved the firm over \$300K in the first 4 months.
- **Clinical operations pipeline.** Patient-intake and records pipeline that cut manual data entry about 70%. PHI stays in the client environment. Running under a BAA.
- **Ecommerce operations platform.** Catalog and attribution platform over Shopify, ad, and 3PL data that retired two five-figure-a-year dashboards.

Client names are withheld under NDA. Full walkthroughs, including architecture and numbers, are available on request.

COMPANY DATA

LEGAL NAME	Two Two LLC, dba SilverArrows
BUSINESS SIZE	Small Business (self-certified)
UEI / CAGE	Not yet issued. Sent on request as soon as they are.
SAM.GOV	Registration in progress
LOCATION	Los Angeles, CA. Remote across the US.
POC	Omri Cohen, Founder & Principal
EMAIL	omri@silverarrows.ai
WEBSITE	https://silverarrows.ai
